

## Fire Extinguisher Covers

### Features:

- Made of reinforced vinyl (PVC)
- UV resistant
  - The effects of UV exposure may result in discoloration and slight increases in tensile strength and elasticity. UV exposure has extremely shallow penetration depths (less the 0.01 inch). UV degradation occurs only when directly exposed to sunlight. Heavy duty PVC is ability for increased UV resistance.
- Hook and loop fastener for quick release
- Water resistant
- Mildew and fungal resistant
- Elastic back covers have grommet at bottom and bottom pull tab
- Other custom sizes and style available upon request

| Description                               | Height (in.) | Width (in.) |
